

Name: Areeba T. Shoaib

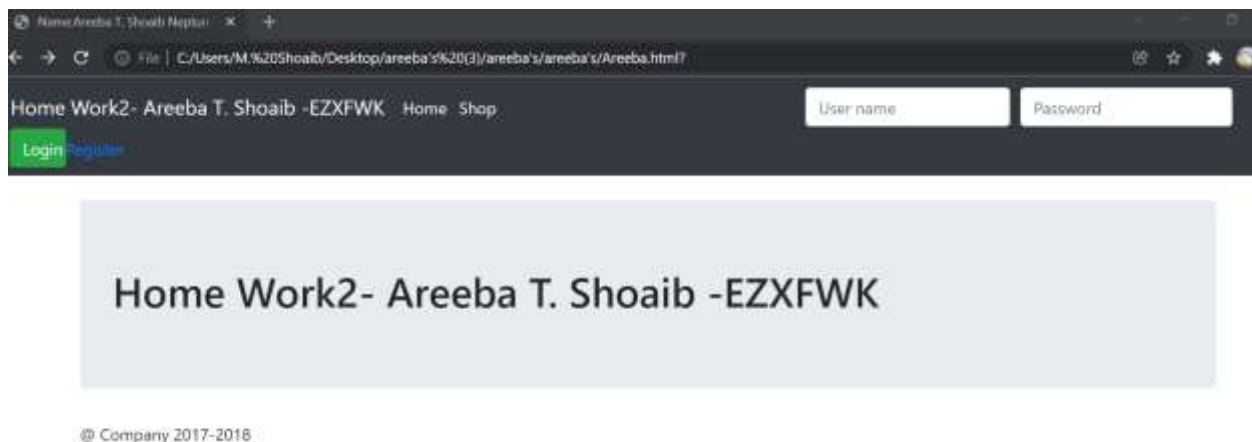

Neptun: EZXFWK

Web Assignment

Professor: David Sik

- **HOME PAGE:**

To go to homepage, we have to click on homepage.html from the zip file which I submitted. Its going to open the chrome browser which shows the below picture. It contains my name and Neptun code, as was mentioned in the requirements. My CSS is already embedded in my html, so I don't need it separately. Its optional.

NOTE: Please try to use Google Chrome during testing.

- **REGISTER PAGE:**

To reach the registration page, we have to click on register. The registration page will show us the form. If we fill the form correctly and click on submit, then its going to take us on to-do page. But, if we click cancel, it will again take us on home page.

Age(between 18 and 99)

Introduction

- **TO-DO PAGE:**

After pressing the submit button, we will reach to do-page, as shown below. In to-do page we can add different entities and perform different functionalities on it.

- **Entries in TO-DO PAGE:**

In this, we can add entries by writing the name and then clicking on plus sign. I have added few entries as shown in the picture. All the entries are active.

- **Deletion:**

We can also delete any entry we want. Before deleting, its going to ask us to make sure that if we really want to delete or not. We can click OK or CANCEL as per our requirement.
